

## NOTICE TO RESIDENTS OF 662 TO 720 LIVE OAK DRIVE

Starting On/About Nov. 6 and Continuing Through Nov. 17, Excavation of Live Oak Drive Offshoot and the Driveway of 720 Will Require Brief Traffic Stoppages

I-495 Express Lanes Northern Extension (495 NEXT) Project

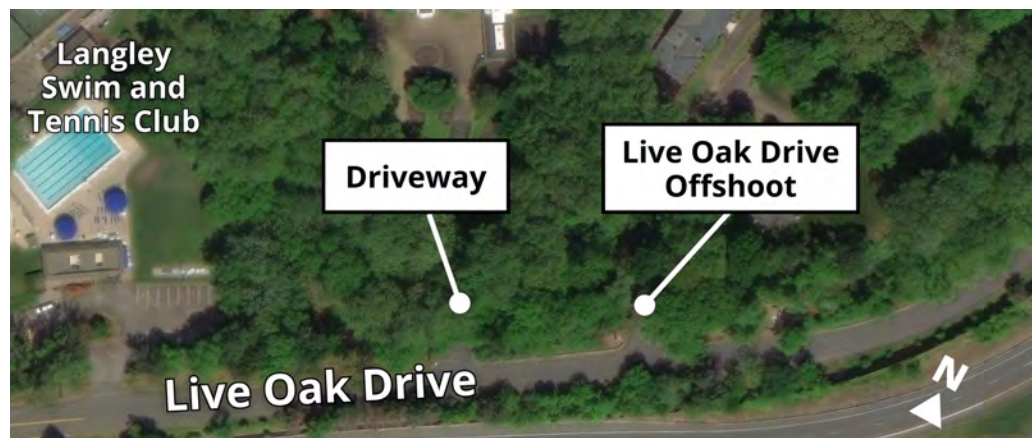

### What's Happening?

Starting on/about Monday, November 6, and continuing through Friday, November 17, installation of a new waterline will require trenching across the split of the Live Oak Drive offshoot as well as the driveway of 720 Live Oak Dr. The excavation work will start across the driveway of 720, taking approximately two days. Next, crews will excavate the mouth of the split of Live Oak Drive, with the work anticipated to be completed over an estimated seven additional days. Excavated areas will be backfilled as soon as the waterline installation is complete.

### How Will it Affect Residents?

Vehicular access will be maintained at all times with the use of steel plates to cover excavated areas. However, when vehicles approach the two areas during active excavation, the work will be paused as steel plates are moved to cover the dug-up area. Motorists should expect delays of approximately five minutes as the steel plates are moved.

Flaggers using revolving "Stop/Slow" signs will be stationed in advance of the work to ensure safe operations.
